A Hosted Project Collaboration Service for Manufacturing

Share your digital design data instantly, accurately, and for less cost with **Autodesk Streamline® 5**, an easy-to-use hosted environment for sharing design and project data with anyone who needs it—anytime, anywhere. Easy to install for a fast return on your technology investment, the Autodesk Streamline service connects your extended team and improves communication across your supply chain. With accurate viewing and redlining to support design innovation, effective reuse of designs to reduce time to market, and better communication to enhance product quality, Autodesk Streamline helps improve business processes throughout your product lifecycle.

Using Autodesk Inventor and Autodesk Streamline to bring intelligent and innovative solutions to this industry was an important business decision for us and gives us a significant competitive advantage.

—Chris Lajoie
CAD Administrator

Sharing Made Easy

The latest technology enhancements to Autodesk Streamline increase your capacity to publish design content while connecting your company more efficiently to suppliers, customers, and trading partners. With Autodesk Streamline software you can share and track design and business data and instantly benefit from collaboration through reduced costs and extended reach of information. With offline viewing capabilities, support for Pro/ENGINEER®, and a single-source collaboration environment that's easy to use, you can increase productivity and extend your reach into global markets quickly and affordably.

Improved Supplier Collaboration

Autodesk Streamline 5 gives you better control over your business processes by simplifying data sharing for team members throughout your supply chain. Enhanced system performance helps you administer larger sites and communicate with

extensive teams more easily than ever. Integration with Autodesk Inventor® vaulting capabilities ensures access to the latest project data at all times and immediately improves process efficiency without the need for complex reengineering.

Fast Return on Your Technology Investment

By extending your collaboration capabilities across your supply chain, Autodesk Streamline helps you eliminate the conventional printing, shipping, and travel costs associated with sharing project data. With a single-source environment for sharing, red-lining, and reviewing your design and business data, you can improve business processes faster and more affordably than ever.

Autodesk Streamline 5

New Productivity Enhancements

- Enhanced project-hosting capabilities simplify project administration and improve performance for large sites. Expanded permission controls, information deposit capabilities, and project cloning functions make supply-chain collaboration faster and easier.
- Vault integration with Autodesk Inventor software ensures that all team members have access to the latest product information at all times. Publish the right data to the right people quickly and easily.
- Easy-to-use Request For Quote function provides simplified management and tracking of all RFQ information, reducing costs of managing suppliers and accelerating time-to-market.
- Offline viewing provides access to Autodesk Streamline package files anytime, anywhere for maximum productivity. Access digital design data without an Internet connection or the need for a native CAD application.
- Indexed Full Content Search capabilities return fast search results of Autodesk Streamline package files, including properties and component names, to boost productivity and reduce time spent searching for data.
- Multi-CAD capability extends your viewing and publishing capabilities to multiple authoring tools. View and publish Pro/ENGINEER parts and assemblies to the Autodesk Streamline environment without having to purchase additional Pro/ENGINEER licenses.
- Enhanced graphics support and texture-mapping capabilities capture design intent more accurately.

System Requirements

- Intel® Pentium® II–based PC with 450 MHz or faster processor (266 MHz minimum)
 - Microsoft® Windows® XP Professional, Windows 2000 (SP2 or later), or Windows NT® 4.0 (SP6 or later)
 - 256 MB RAM (128 MB minimum)
 - 70 MB free disk space
 - 1024x768 display or higher
 - Broadband (DSL, cable modem, or better) Internet connection (56Kbps minimum)
 - Microsoft Internet Explorer 5.01 or later
- To publish digital design data, you will need an installation of Autodesk Inventor 6 or 7, Autodesk Inventor Professional, AutoCAD® Mechanical 2004, AutoCAD® 2004, Autodesk® Mechanical Desktop® 5 or higher software, or Pro/ENGINEER 2001 (Windows)

Purchase or Learn More

To purchase Autodesk Streamline, contact a sales representative at (888) 870-1428 (in the United States) or +1 509-838-9752 (outside the United States.)

Autodesk Professional Services provides integrated consulting, training, and support to help you get the best return on your investment in Autodesk technology. To find out more, visit www.autodesk.com/professionalservices.
